

AGM Batteries and Chargers for **aquawatt** Outboard engines

AGM (Absorbed Glass Mat) sealed battery technology was developed in 1985 for military aircraft where power and weight were paramount considerations. AGM batteries has become the highest evolution of deep cycle sealed batteries for marine and RV applications. This technology delivers increased safety, performance, and service life over all other existing sealed battery types, including gel technology. The AGM battery gives exceptional high power because its very low internal electrical resistance.

To avoid different voltages of single batteries we have developed an equalizer system which distributes the charging and discharging energy exactly on all single batteries of the system.

PRICE LIST 1 - 2015 minimum order 4 pcs

AGM Batteries, suitable for aquawatt outboard engines					sales price 2014 in EURO ex works	
Type / Voltage	Lenght, width, height in mm	Weight	Capacity C20 / C 5 Ah	Price excl. VAT	Price incl. 20 % VAT	
12 LC-100 12 Volt	328 x 172 x 222	30 Kg	107 Ah / 86 Ah	245.-	294.-	
12 LC-130 12 Volt	407 x 177 x 225	35 Kg	128 Ah / 103 Ah	290.-	348.-	
12 LC-134 12 Volt	340 x 173 x 280	41,50 Kg	143 Ah / 115 Ah	345.-	414.-	
12 LC-150 12 Volt	483 x 170 x 240	44,50 Kg	160 Ah/ 129 Ah	375.-	450.-	
12 LC-180 12 Volt	530 x 209 x 214	53 Kg	193 Ah / 155 Ah	445.-	534.-	
12 LC-200 12 Volt	522 x 240 x 219	60 Kg	214 Ah / 172 Ah	475.-	570.-	
12 LC-225 12 Volt	522 x 240 x 223	65 Kg	243 Ah / 194 Ah	545.-	654.-	
12 LC-260 12 Volt	520 x 268 x 220	74 Kg	278 Ah / 225 Ah	610.-	732.-	
Chargers						
Charger AGM 1, 230 V - 48 V 20 A				560.-	672.-	
Charger AGM 3 , 230 V - 48 V 35 A oder 80 V - 18 A				1.160.-	1.392.-	
Balance Module for charge balance between 2 AGM Batteries, 1 piece				90.-	108.-	
Required quantity for Green Power engine 4 x 12 V = 48 V						
Required quantity for Green Force engine 4 x 12 V = 48 V						
Required quantity for Green Thruster engine 7 x 12 V = 84 V						

Publication is non binding. Information subject to changes without prior notice.
